

## Battery Wall Controller

The light switch who can do much more

As manageable  
as a light switch

Manages own Z-Wave network  
or works as secondary controller

4 buttons can be assigned free  
(as single buttons or button pairs)

Controls devices directly  
(on/off; up/down)

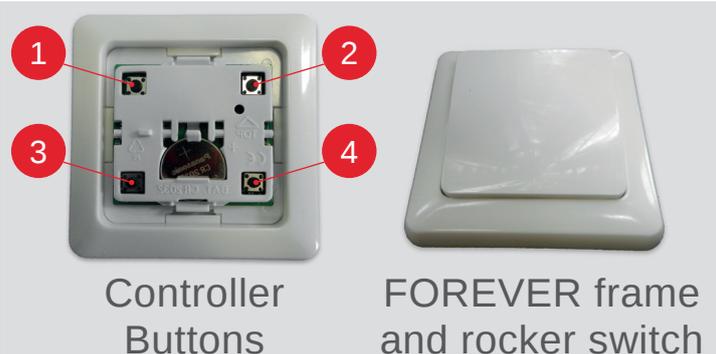

Triggers complete scenes defined  
by smart home control center

Controls with standard  
and enhanced security

Positioning on every  
planar surface

Rocker switch and frame  
in FOREVER design

Longer battery life due to  
optimized energy management

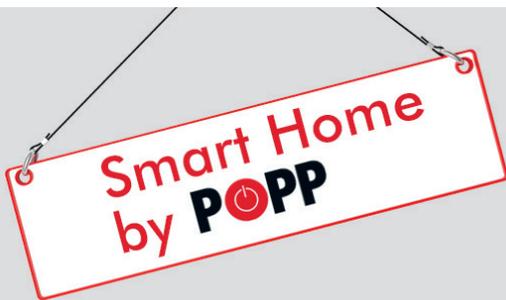

With the **POPP Battery Wall Controller** you can control your smart home from everywhere in the room, because the flat switch can be positioned on and removed from every planar surface without laying or pay attention cables. Switch the lights, the heating and window blinds with only one touch of a button.

Using the wall controller is as simple as using an ordinary light switch – but with much more functions. The device could be used as primary controller and secondary controller as well. With the buttons 3 and 4 new Z-Wave devices can be added to the wireless wall controller. Equally you can remove devices from your Z-Wave network.

Due to primary controller function you can use the battery wall controller as standalone remote control as well without using any smart home gateway. Devices such as sockets, window blinds, dimmer, lights and electronic door locks can be switched by the controller directly. Once one device is added to the wall controller it checks the device type (switch, dimmer,...) and assigns the buttons with correct commands.

Of course you can also include the battery wall controller to an existing Z-Wave smart home network. Therewith you have the possibility to trigger defined scenes such as the closing of the shutters with simultaneous switching on all lights in the room by only one touch of a button. Or place the wall controller next to your entrance door and start the scenario “All off” when you’re leaving home to switch off all lights and electrical devices you don’t need during absence with only one touch of a button.

-  Heating and Climate Control
-  Security Systems
-  Lighting Control
-  Alarm Systems
-  Remote Controls
-  Control Center/ Gateway
-  Sensors
-  Device Control/ Plugs
-  Window and Blind Control

With POPP products your home will become intelligent. Control your house or apartment by tablet pc, desktop pc, smartphone or remote control. Activate the heating when you’re heading home, close your windows automatically if the weather changes and receive short messages when sensors set off any alarm at home.

For its smart home products POPP trusts Z-Wave technology. Z-Wave is the international leading standard for wireless communication between intelligent devices in homes and offices and thereby the basis for successful home automation.

POPP smart home products are compatible and interoperable with Z-Wave certified devices from more than 300 manufacturers worldwide.
